

2011 Marks Duncan's 75th Anniversary

PRESS RELEASE. For Immediate Distribution

MILWAUKEE, Wis., January 26, 2011 – Duncan Solutions, a leading provider of parking and traffic management products and services, proudly celebrates its 75th anniversary in 2011.

Duncan Solutions was founded in 1936 in a small corner of the Duncan Toy Company, which made and sold the Duncan Yo Yo. Donald Duncan, owner of the toy company and inventor of the Duncan Yo Yo, decided to experiment with parking meters as a sideline. Soon, however, the parking meter division grew to monopolize the entire plant and the toy business moved elsewhere.

Over the years, Duncan continued to grow through innovative engineering and a dedication to quality products and service. Although the company began as only one of a dozen parking meter companies in the United States, Duncan soon emerged as the industry leader.

“At Duncan we still retain the values that enabled the company to achieve its position in the industry,” said Mike Nickolaus, President and CEO of Duncan Solutions. “Incorporating the latest technology into the highest-quality products, Duncan continues to lead by providing municipalities with innovative answers to their evolving parking needs.”

Today, Duncan Solutions is a global leader in on-street parking solutions, offering integrated capabilities across the entire spectrum from parking space allocation and management through enforcement to parking citation processing and collections.

Evidence of Duncan's continued growth and commitment to quality and technological leadership can be found in each product and service line offered. “2011 is an exciting year for Duncan,” said Nickolaus. “In addition to numerous product enhancements across our portfolio, we are rolling out our Liberty™ single-space meter mechanism that accepts credit cards. We are also excited about the upcoming launch of our new vehicle sensor whose accuracy and cost-effectiveness will redefine and broaden the business case for widespread sensor deployment.”

Other upgrades include the expanded and upgraded CashKey program, and the enhanced photo capabilities of the AutoCITE X3 handheld device that now features a 3-megapixel camera with flash. Duncan has recently rolled out numerous multi-media enhancements to its AutoPROCESS system, and continues to expand its relationships with State DMVs for its DMVRegInfo registered owner information retrieval service.

In addition to technological advancement through new and upgraded product releases, Duncan brings together all aspects of its portfolio in the delivery of on-street parking service operations for cities such as St. Louis and Atlanta, showcasing the company's integration and project management expertise.

Duncan Solutions was created by bringing together leading parking products and services companies, including Duncan Technologies, Professional Account Management, Enforcement Technology, Reino Parking Systems and Law Enforcement Systems. Duncan is a full service on-street parking management company and a leading provider of parking products and services to municipal and commercial clients worldwide.
